## FINK OUTSIDE THE BOX

**Tresserra Formulas €60,000**

Limited to a series of just 12, the Formulas cupboard is the latest creation by revered Catalan designer Jaime Tresserra. Made in walnut, teak or ebony, this is a bespoke piece of furniture designed to push the limits of functionality and expression. Mathematical formulae are laser-carved into the front of the cabinet, a labyrinth of storage and display compartments. Perfect for the math-minded hedge. But beware: though the cupboard may prove to be a profitable investment, the formulae do not guarantee good returns. [tresserra.com](http://tresserra.com)
